Massimo Gianolli, Chief Executive Officer of Generalfinance, declared: "The first semester of the year showed a trend in line with the budget for the year. From a commercial standpoint, we registered additional growth in the flow of disbursements, amounting to EUR 932 million, +20% compared to 2022, with net revenues up by 12%, thus confirming the constant growth trend, in a liquidity shortage context for companies that are distressed or with low ratings - our target customers - which have limited access or no access to bank credit, concentrated primarily on low risk counterparties or on medium/long-term loans guaranteed by the State.

Our team is strongly committed to supporting customers and increasing turnover volumes in the coming quarters, in line with the matters defined in the Business Plan."

Economic data and operating structure

Net interest income amounted to EUR 3,8 million, up by 2% compared to the same period of the previous year, due to the upward trend in Euribor rates which had a negative impact on the cost of funding, offset by the increase in volumes and the increase in the average rate on advances paid to customers. Net fee and **commission income** amounted to EUR 12.5 million, up compared to EUR 10.8 million in the first six months of 2022 (+15%). The trend in net fee and commission income was affected by the particularly positive trend in turnover (+22% with respect to the first semester of the previous year) and the contained reduction of commission rates, reflecting the excellent commercial and operating performance of the Company.

Net interest and other banking income amounted to EUR 16,3 million (+ 12%) while **operating costs**, equal to around EUR 6,4 million, compared to 7 million euros in the first semester of 2022, which however included the costs related to the IPO process passed through the income statement.

Taking into account the particularly low **cost of risk** (net value adjustments of EUR 0.3 million, with an annualised cost of risk at 3 basis points) and estimated taxes of EUR 3 million, the **net result for the period** was approximately EUR 6,7 million compared to EUR 4,9 million recorded in the first six months of 2022 (+35%).

Balance sheet, funding and asset quality data

Net loans to customers amounted to EUR 408,7 million, up by 6% compared to 31 December 2022. The disbursement rate is almost equal to 82% (83% in 2022) while the average number of days of credit of 66 was essentially decreased compared to the 2022 figure (75).

Within the aggregate of loans, total **gross non-performing loans** amounted to EUR 1,0 million, with a gross NPE ratio of approximately 0.25% (0.11% of the net NPE ratio). The coverage of non-performing loans stood at 54%.

Cash and cash equivalents - represented by loans to banks - amounted to approximately EUR 48 million - reflecting the prudent profile of liquidity management - while **total balance sheet assets** amounted to EUR 470 million, compared to EUR 443.8 million at the end of 2022.

Property, plant and equipment amounted to EUR 5,2 million, compared to approximately EUR 4.9 million in 2022. **Intangible assets** amounted to EUR 2,3 million, substantially unchanged compared to the end of 2022. **Financial liabilities** measured at amortised cost, equal to EUR 387,7 million, are made up of payables of EUR 345,2 million and securities issued totalling EUR 42.5million.

Own funds and capital ratios

Own funds amounted to EUR 62.7 million (EUR 60.6 million as at 31 December 2022). **Risk-weighted assets** amounted to EUR 370.2 million, compared to EUR 344.1 million at the end of 2022.

Generalfinance's **capital ratios** - including profit for the period net of the expected dividend, calculated by taking into account a *target pay-out* of 50%, in line with the Company's *dividend policy* - highlight the following values:

- 14.44% CET1 ratio;
- 14.44% TIER1 ratio;
- 16.94% Total Capital ratio.

The ratios are well above the minimum regulatory values set forth in Bank of Italy Circular 288.

Impact resulting from the conflict between Russia and Ukraine

Also with reference to the matters indicated by ESMA in the public statement "Implications of Russia's invasion of Ukraine on half-yearly financial reports" dated 14 March 2022 and the CONSOB communication of 19 March 2022 "Conflict in Ukraine: Consob warnings for supervised issuers on financial reporting and on the obligations related to compliance with the restrictive measures adopted by the European Union against Russia, as well as on the obligations of online portal operators", it should be noted that the direct presence of Generalfinance in the Russian/Ukrainian/Belarusian market (areas directly affected by the conflict) is nil, as the Company has factoring relationships only with Assignors active in Italy. With reference to the Transferred Debtors based in Russia, Ukraine and Belarus, it should be noted that Generalfinance does not have exposure at the end of the semester. Since the invasion of Ukraine, Generalfinance has moreover suspended the credit lines relating to Transferred Debtors operating in the countries directly involved in the conflict.

Significant events after the end of the year

As of today's date, no significant events occurred after the end of the year.

Business outlook

In the current context, with reference to the prospects for 2023, we need to take into consideration possible further impacts, particularly on the business system, of the effects of the geopolitical tensions underway - in particular, the ongoing conflict between Russia and Ukraine - and of other macroeconomic factors that emerged at global level in the second part of 2022 (marked increase in the rate of inflation, marked increase in energy costs and in the cost of borrowing).

In said general framework still characterised by critical elements for the real economy, the sales activities developed by Generalfinance in the first semester of 2023 - trend in turnover, revenues and profitability show a trend in line with that defined in the *budget* on a consistent basis with the Business Plan in force with reference to the current year. These elements allow us to predict a business performance and related net profitability for the whole of 2023 at levels in line with the *budget* Business Plan.
