Generalfinance: Overview

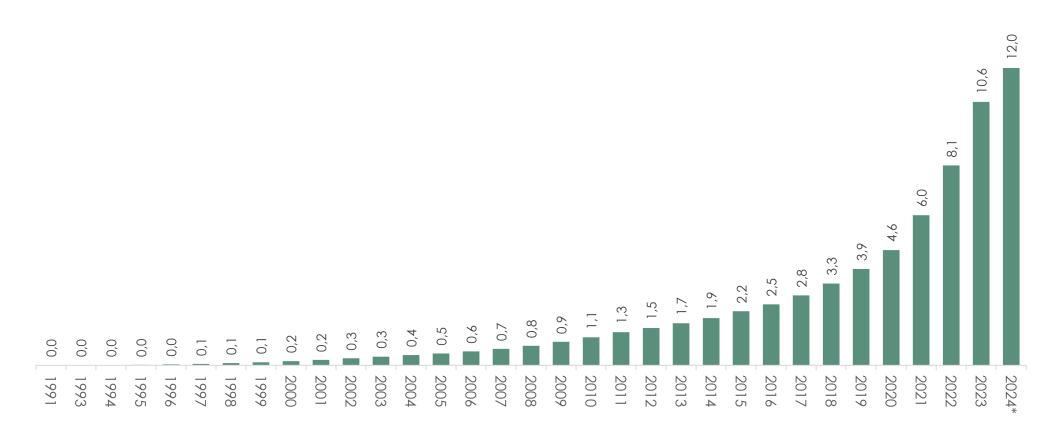

Long Standing Experience, Specialisation and Unique Positioning

Company Milestones - Turnover

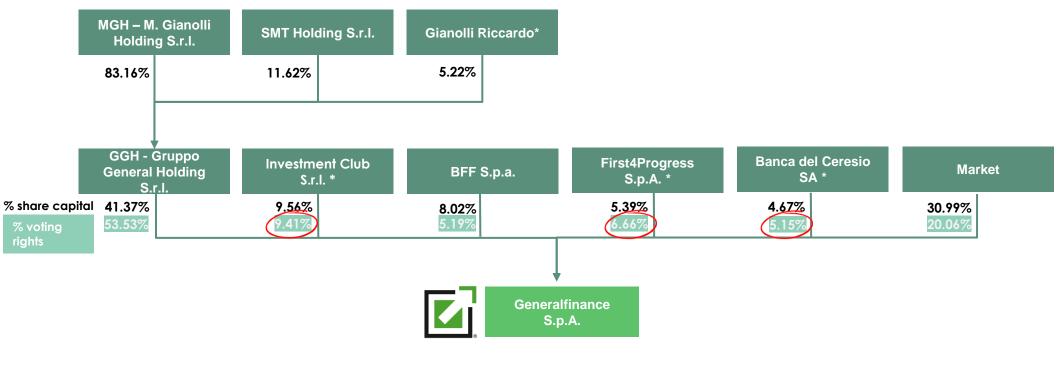

With the **1,4 bn turnover** in 1H **2024**, total factored receivables since the start of the factoring operation (1991) amounts to approximately **12,0 bn**

Strong and long term oriented shareholder base

Shareholders' structure

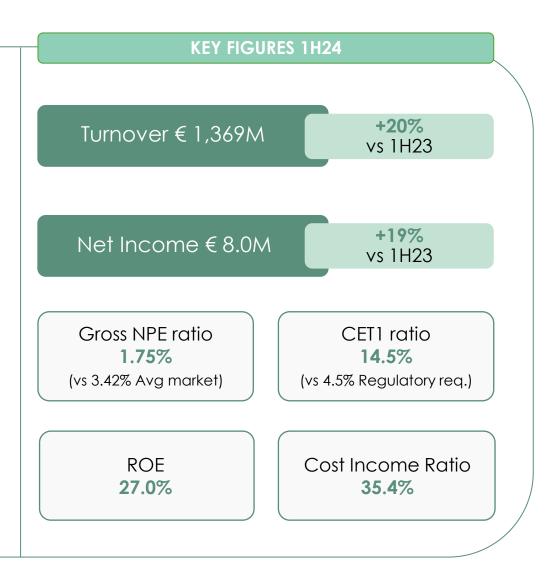

Increased voting rights

On July 15, 2024, the Shareholders Investment Club S.r.I., First4Progress S.p.A. and Banca del Ceresio SA acquired the increase in voting rights, with respect to the shares (*) for which, on that date, it was ascertained that the period of twenty-four months of uninterrupted registration in the Special List had elapsed. Consequently, the overall distribution of voting rights was proportionally changed, due to the higher number of voting rights resulting from the aforementioned increase.

Leader in the high-growth distressed market segment

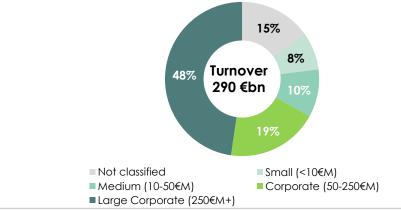

In the overall fast growing factoring market (turnover in Italy is expected to grow from € 290bn in 2023 up to €300bn in 2024) Generalfinance focuses on distressed sellers (UTP, forborne and past due) with a portfolio of performing debtors (in bonis)

Ranking of the Italian factoring market – 2023 (%)

Addressable market

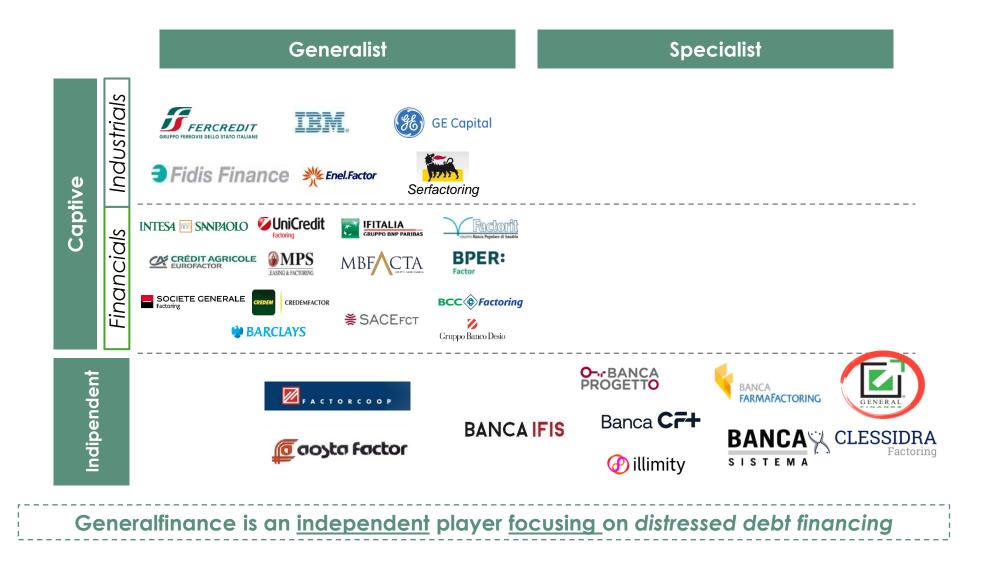

Potential turnover of factoring to distressed enterprises^{*} (€Bn, 2022-2024F)</sup>

The worsening financial conditions of Italian companies expected in the next three-year period and the consequent increase in rates of deterioration could in fact drive a growth in the potential turnover of factoring to distressed companies by 8 percent annually, up to a market value of ca. 40 billion € by 2024

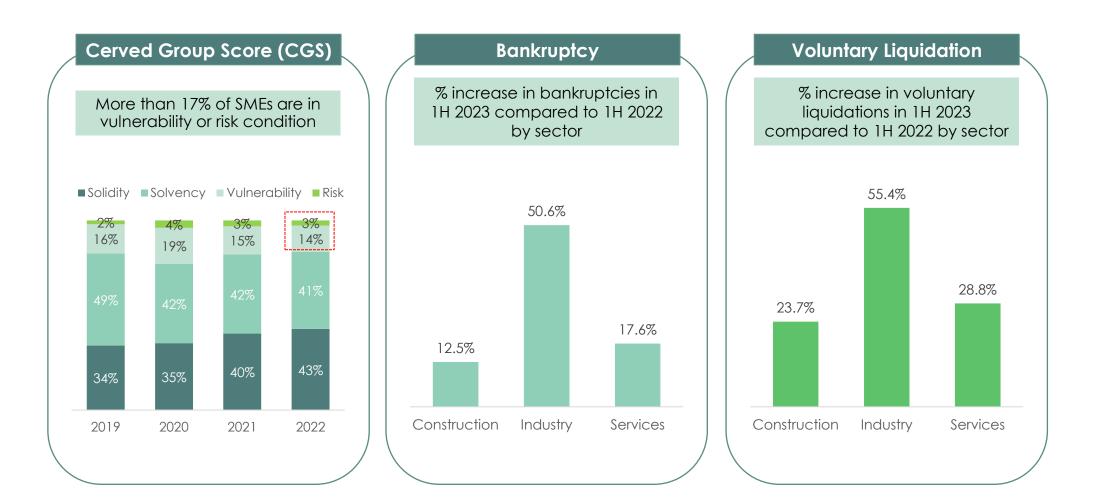

Competitive Positioning

Vulnerable companies and new procedures

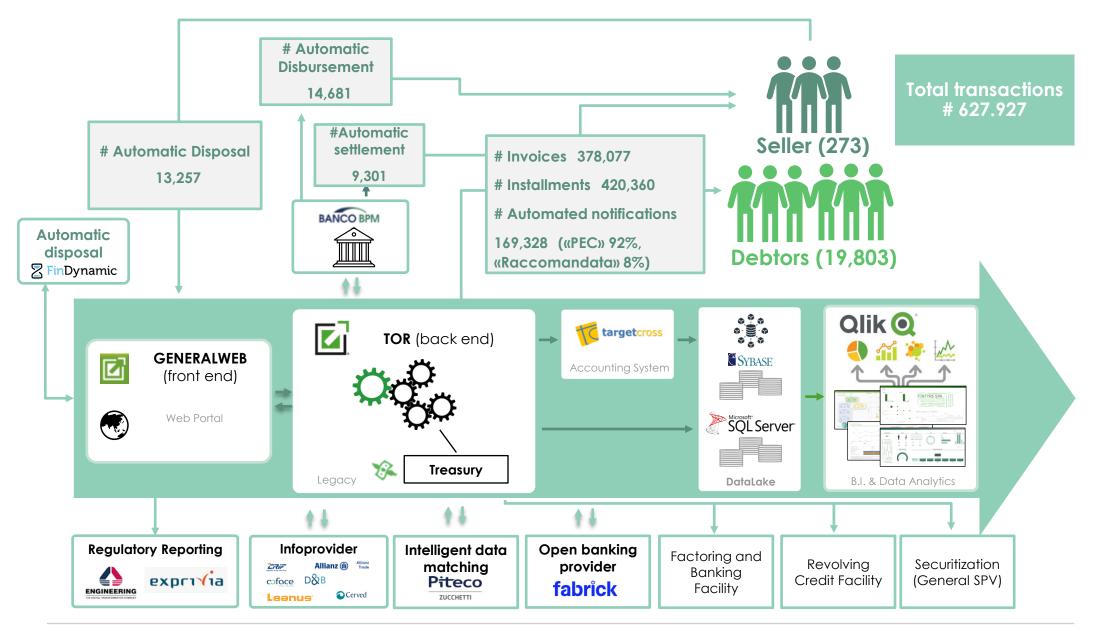

Digital, Low Risk Player

A strategic asset: the proprietary digital platform

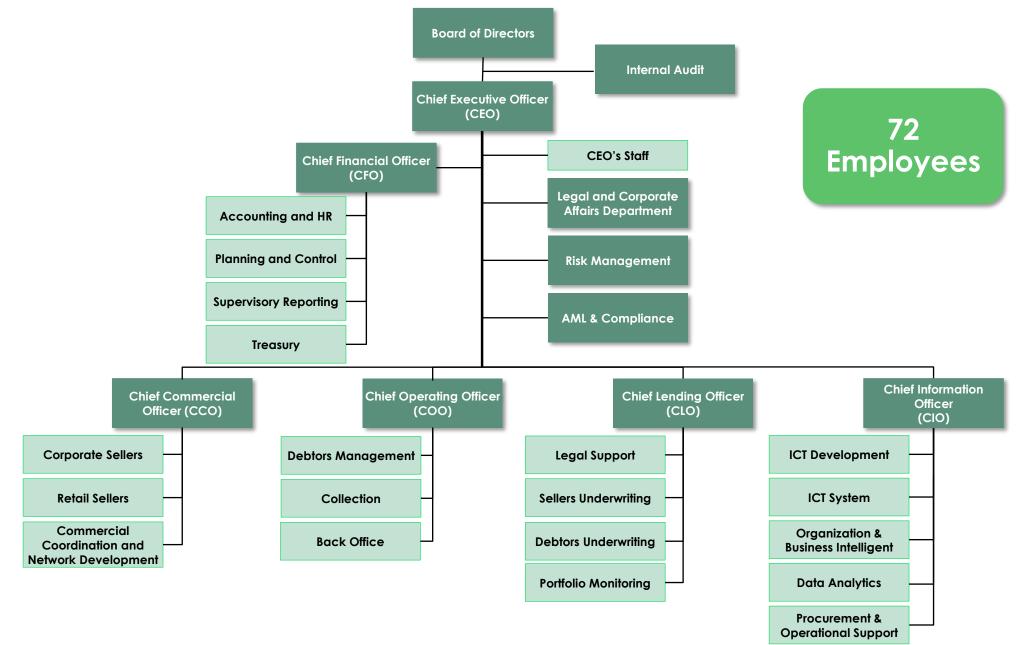

Data LTM, as of June 2024

Total transactions: sum of Automaric Disponsal, Automatic Disbursement, Automatic settlement, Installments and Automated notifications

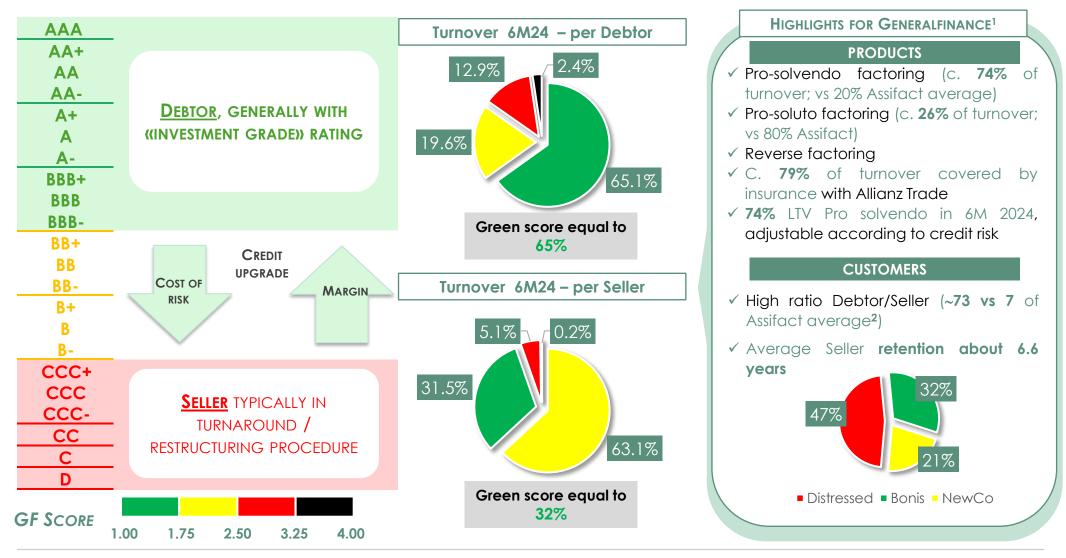

An organization oriented to risk control and business

A unique business model, leveraging the factoring features

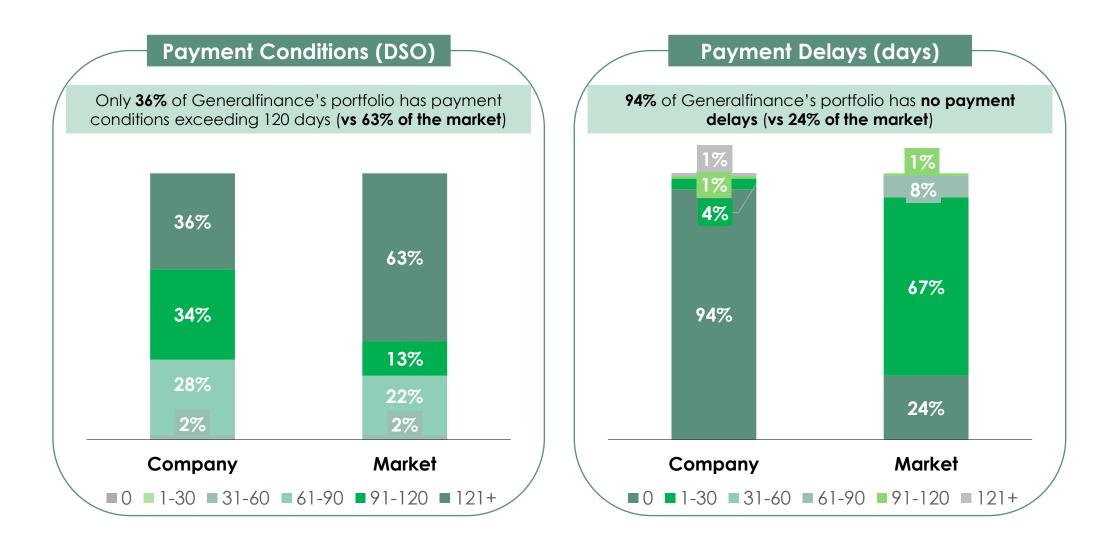

The peculiarity of Generalfinance's business model is the choice of Seller–Debtor, where clients (Sellers) typically have a low credit rating (turnaround situation) while the **Debtors** underlying customer loans refer to a high credit rating (normally investment grade)

Collection performance: a strategic delivery to our Customers

Generalfinance boasts a portfolio quality, both in terms of Payment Conditions and Payment Delays, better than the rest of the market

Value proposition, distinctive features and value chain

Value proposition

Generalfinance offers its customers (mostly companies under financial stress) rapid and customized interventions for the financing of the working capital and trade receivables, covering the entire supply chain finance

"Revolving" relationship (LIR¹ at 24 months) in a predominantly "notification" mode and, where applicable, "acceptance" of the debt

Distinctive skills

- o Consolidated expertise throughout the entire process
- End-to-end in-house valuation process, tailored to customer specifications
- Strong risk reduction and diversification mechanisms
- In-house-developed proprietary factoring platform to support business specifications
- Fast operational processes and capability to provide
 bridge financing within turnaround processes

3

Generalfinance masters all the crossroads of the value chain

- o All operational steps and core activities are carried out internally by Generalfinance's dedicated structures
- Generalfinance does not relies on external consultants to assess the creditworthiness of sellers and debtors but owns all the skills
- The process is reinforced by credit insurance policies provided by Allianz Trade insurance company which, during the risk acquisition phase, performs an independent assessment of the assigned debtors, providing Generalfinance a feedback on the results of their assessment

Risk reduction in Distressed Factoring

Given that the majority of Generalfinance's turnover is realized towards distressed Sellers, the Company can benefit from a reduction in risk, because of 3 main factors

Lower Credit Risk

- Effects of insolvency proceedings on financial position (ex. credit write-offs)
- o Recovery and relaunch plan
- Possible change in the Governance
- Possible capital injection or new financing
- Predeductibility (i.e., superpriority) of receivables arising from loans disbursed in execution of the plan and loans disbursed prior to the submission of the composition with creditors plan, respectively, if the conditions provided by the regulations are met

Lower Operating Risk

- Court approval (arrangement with creditors, restructuring agreement)
- Supervision by the court commissioner (arrangement with creditors)
- Presence of high standing Financial Advisors and Legal Counsels
- Management change

Lower Risk of Clawback Action

- Financial assistance for the implementation of the agreement / plan / arrangement with creditors with exemptions from clawback actions
- Authorization for bridge financing (in these cases, the risk of clawback actions is excluded on a de facto basis)
- Factoring law and related protections (clawback actions regarding collections from assigned debtors)

Closing Remarks

Closing Remarks

2024 first 6 months of the year confirm a growing trend, in line with full year budget:

- Profitability level showing significant growth: net profit up +19%
- Very good asset quality confirmed
- NPE Ratio impacted by more conservative classification policy and single name default
- Further reduction of the cost income ratio, expected to drop further thanks to the very good operating leverage
- An updated organization oriented to risk control and business development
- Macroeconomic evolution and more difficult environment for SME lending support our strategy

New steps ahead to further support our numbers:

- New sellers pipeline set to push a stronger growth ahead
- Robust and diversified funding structure to support future growth
- Strong Capital ratios (TCR > 15%) allowing a sound capital buffer for growth even exceeding strategic plan horizon
- Closing of Workinvoice deal expected by year end with full integration of the invoice discounting business
- Expanding Generalfinance abroad: establishment of Spanish branch expected by year end, subject to Bol approval
- Net Income 2024 guidance confirmed: >20M

Benefits of pro-solvendo lending contract

The offsetting mechanism is a specific technicality of the Factoring Agreement, which is elaborated consistently with the Assifact standard

ARTICLE 28 OF GENERALFINANCE FACTORING AGREEMENT

"The Factor will be entitled to retain sums and set off the debts (of every kind) due by the Factor to the Seller against the Receivables (of every kind) due from the Seller to the Factor, including the Receivables due from the Seller to third parties and assigned to/guaranteed by the Factor.

Should the Seller default on any of its payment obligations, the Factor will be able to treat its Receivables as liquid and payable, even if not already fallen due. Offsets by the Seller require the prior written consent of the Factor".

In FY 2021, Generalfinance paid an average advance equal to 80% of Turnover. With regard to the prosolvendo factoring, Generalfinance is entitled to set off amounts owed by the Sellers to it against amounts owed by Generalfinance to the Sellers based on specific clauses included in the factorina agreement. The Company has a hiah

Debtor/Seller ratio equal to 58, growing steadily over the last 3 financial years, against an average of the Italian factoring market calculated excluding private assigned Debtors - equal to 10¹, which expands the possibilities of offsetting between receivables and debit items against the Sellers as part of pro-solvendo transactions.
