Factoring vs Traditional Bank Credit: Key Differences

Risk Assessment

- Credit risk evaluated not only on the **borrower**, but also on **receivables quality and debtor creditworthiness**
- Allows firms with limited collateral to **leverage their commercial relationships**

Financing Flexibility

- **Factoring limits grow with sales/turnover**
- Unlike bank credit limits, which are **static and require renegotiation**

Information Advantage

- **Continuous receivables monitoring**
- Enables **early detection of distress**
- Provides **real-time credit information across supply chains**
- Leads to **lower Loss Given Default (LGD)**

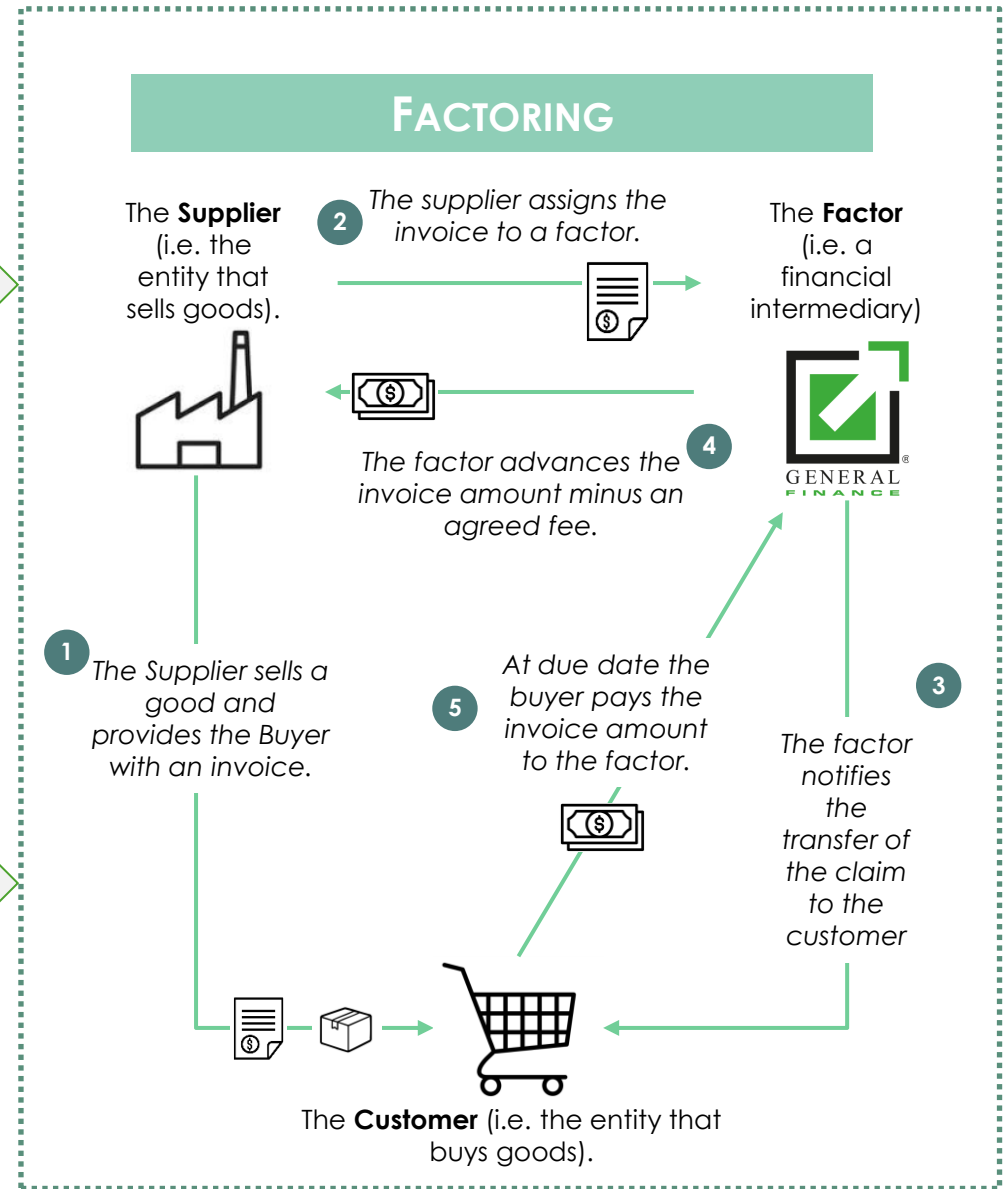

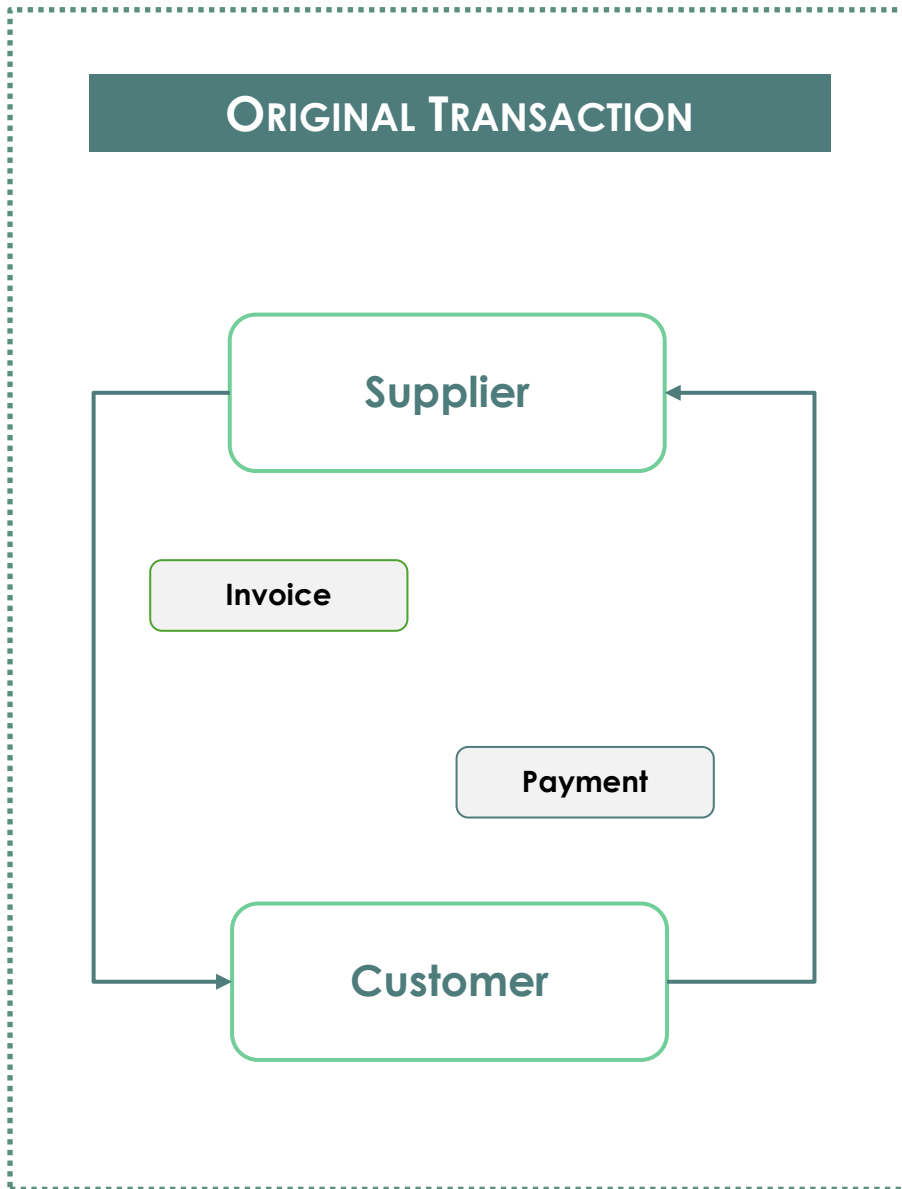

Lower Structural Risk

- Typically **lower NPL ratios**
- **Faster recoveries and higher recovery rates**
- Higher **operational efficiency**
- **Less pro-cyclical** than bank lending

Relationship Structure

- **Long-term client relationships**
- **Short exposure duration** (linked to receivables payment terms, ~60-90 days)

What is Factoring? (1/2)

What is Factoring? (2/2)

Credit management (debtor management and payment collection) is the **core business** of a factoring company and allows the creditor to outsource activities that are usually carried out in-house, thus achieving:

- Greater **effectiveness** (credit management is the core business of a Factor)
- Greater **efficiency** (a Factor can leverage on economies of scale)

1

In the **working capital financing service**, the Factor differs from a bank since it analyses the assigned receivables/debtors in addition to performing the usual creditworthiness assessments

2

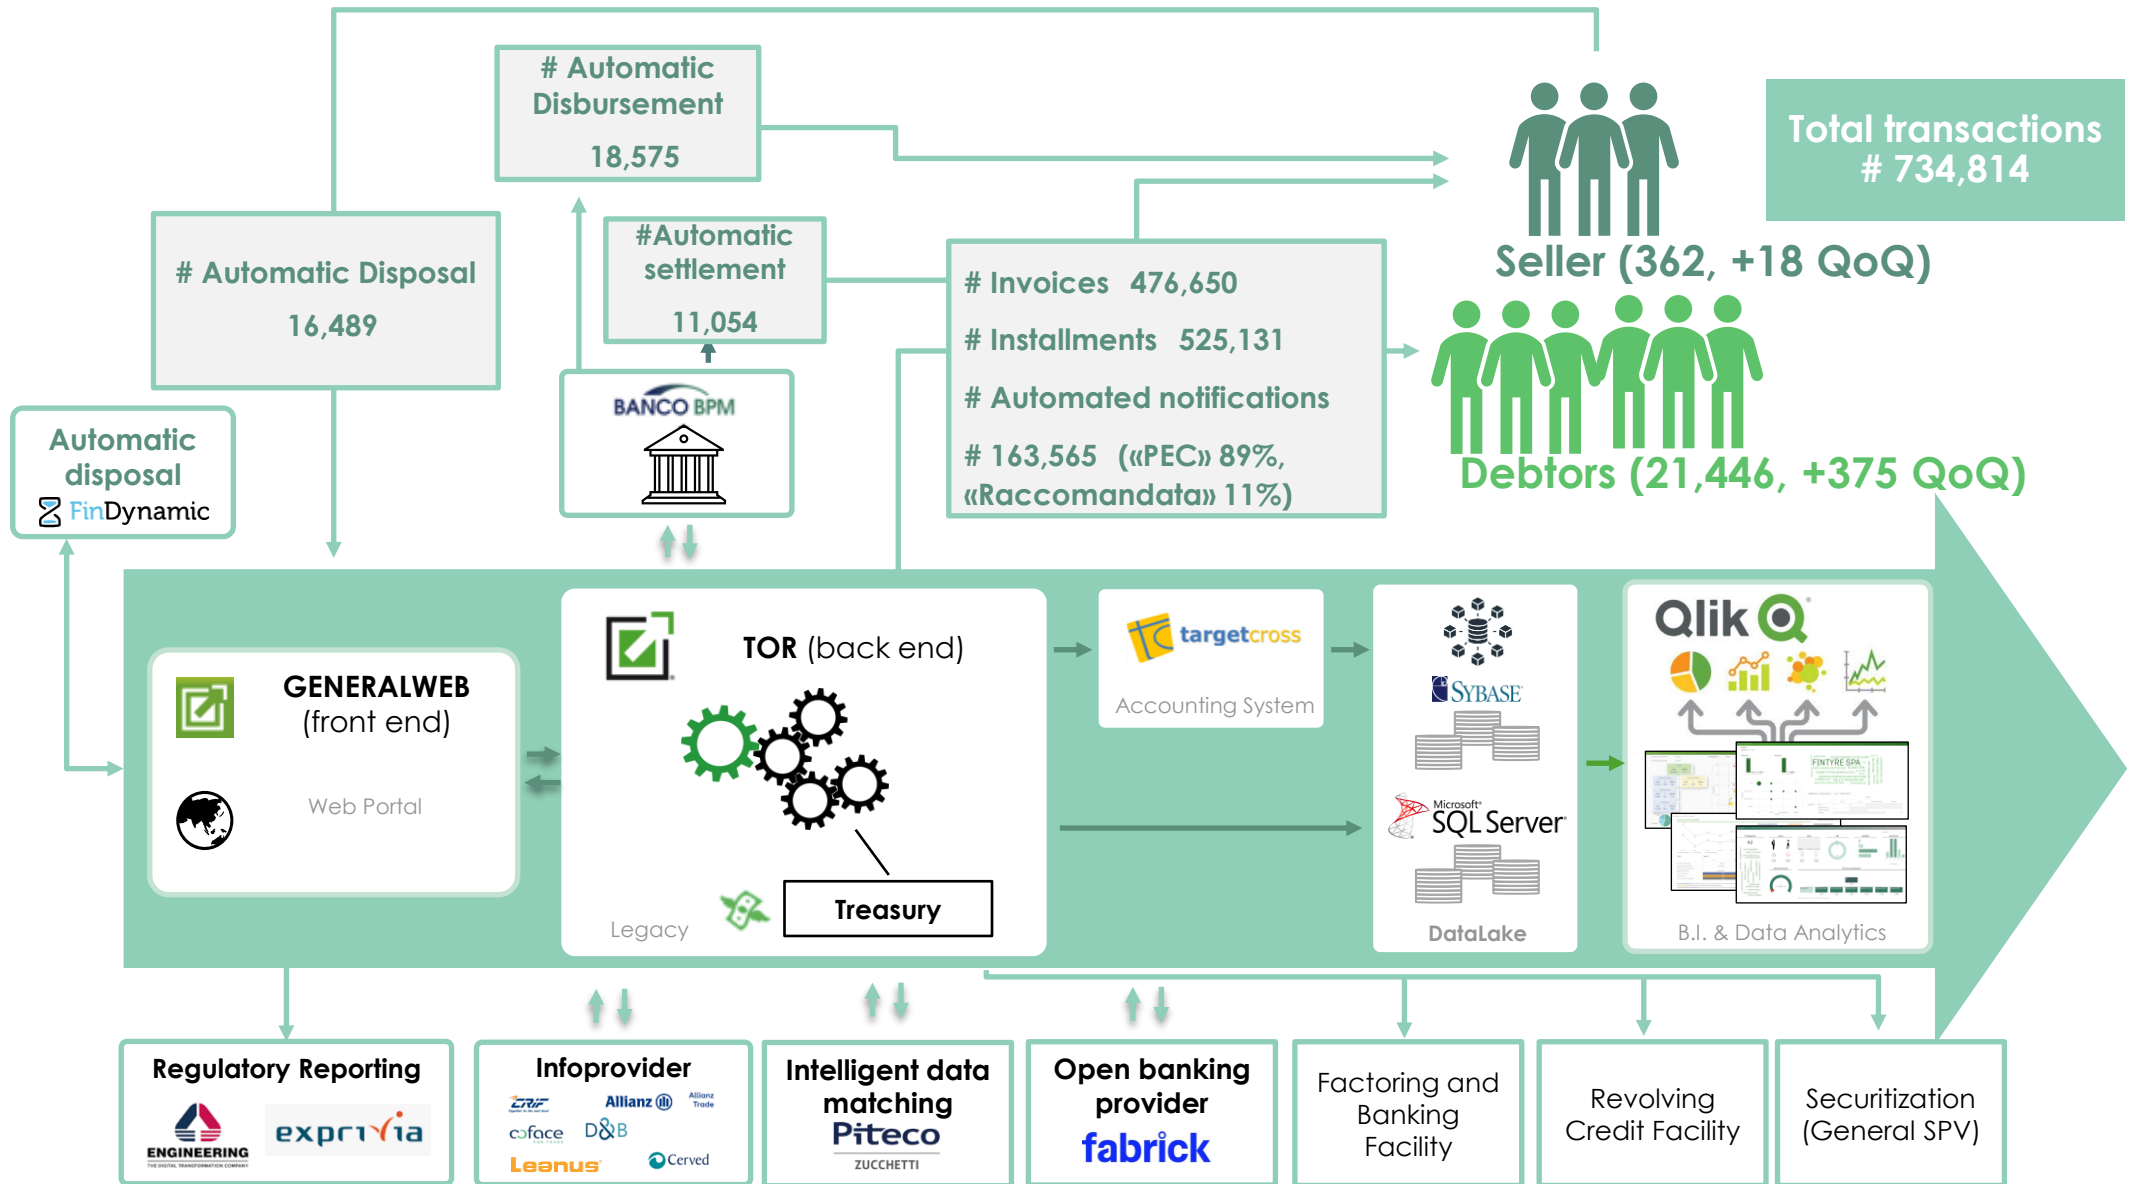

In the **credit insurance** service, the Factor analyses the **specific features of the assigned receivables** and can issue a solvency guarantee

3

FURTHER KEY TAKEAWAYS ON FACTORING

- ❑ Factoring is a **flexible tool** for the **management of working capital**, offering a wide range of services to release, manage and successfully deliver trade receivables;
- ❑ The **legal instrument underpinning factoring** is the **assignment of receivables in accordance with Law no. 52 of 21 February 1991** (Law on the assignment of receivables).

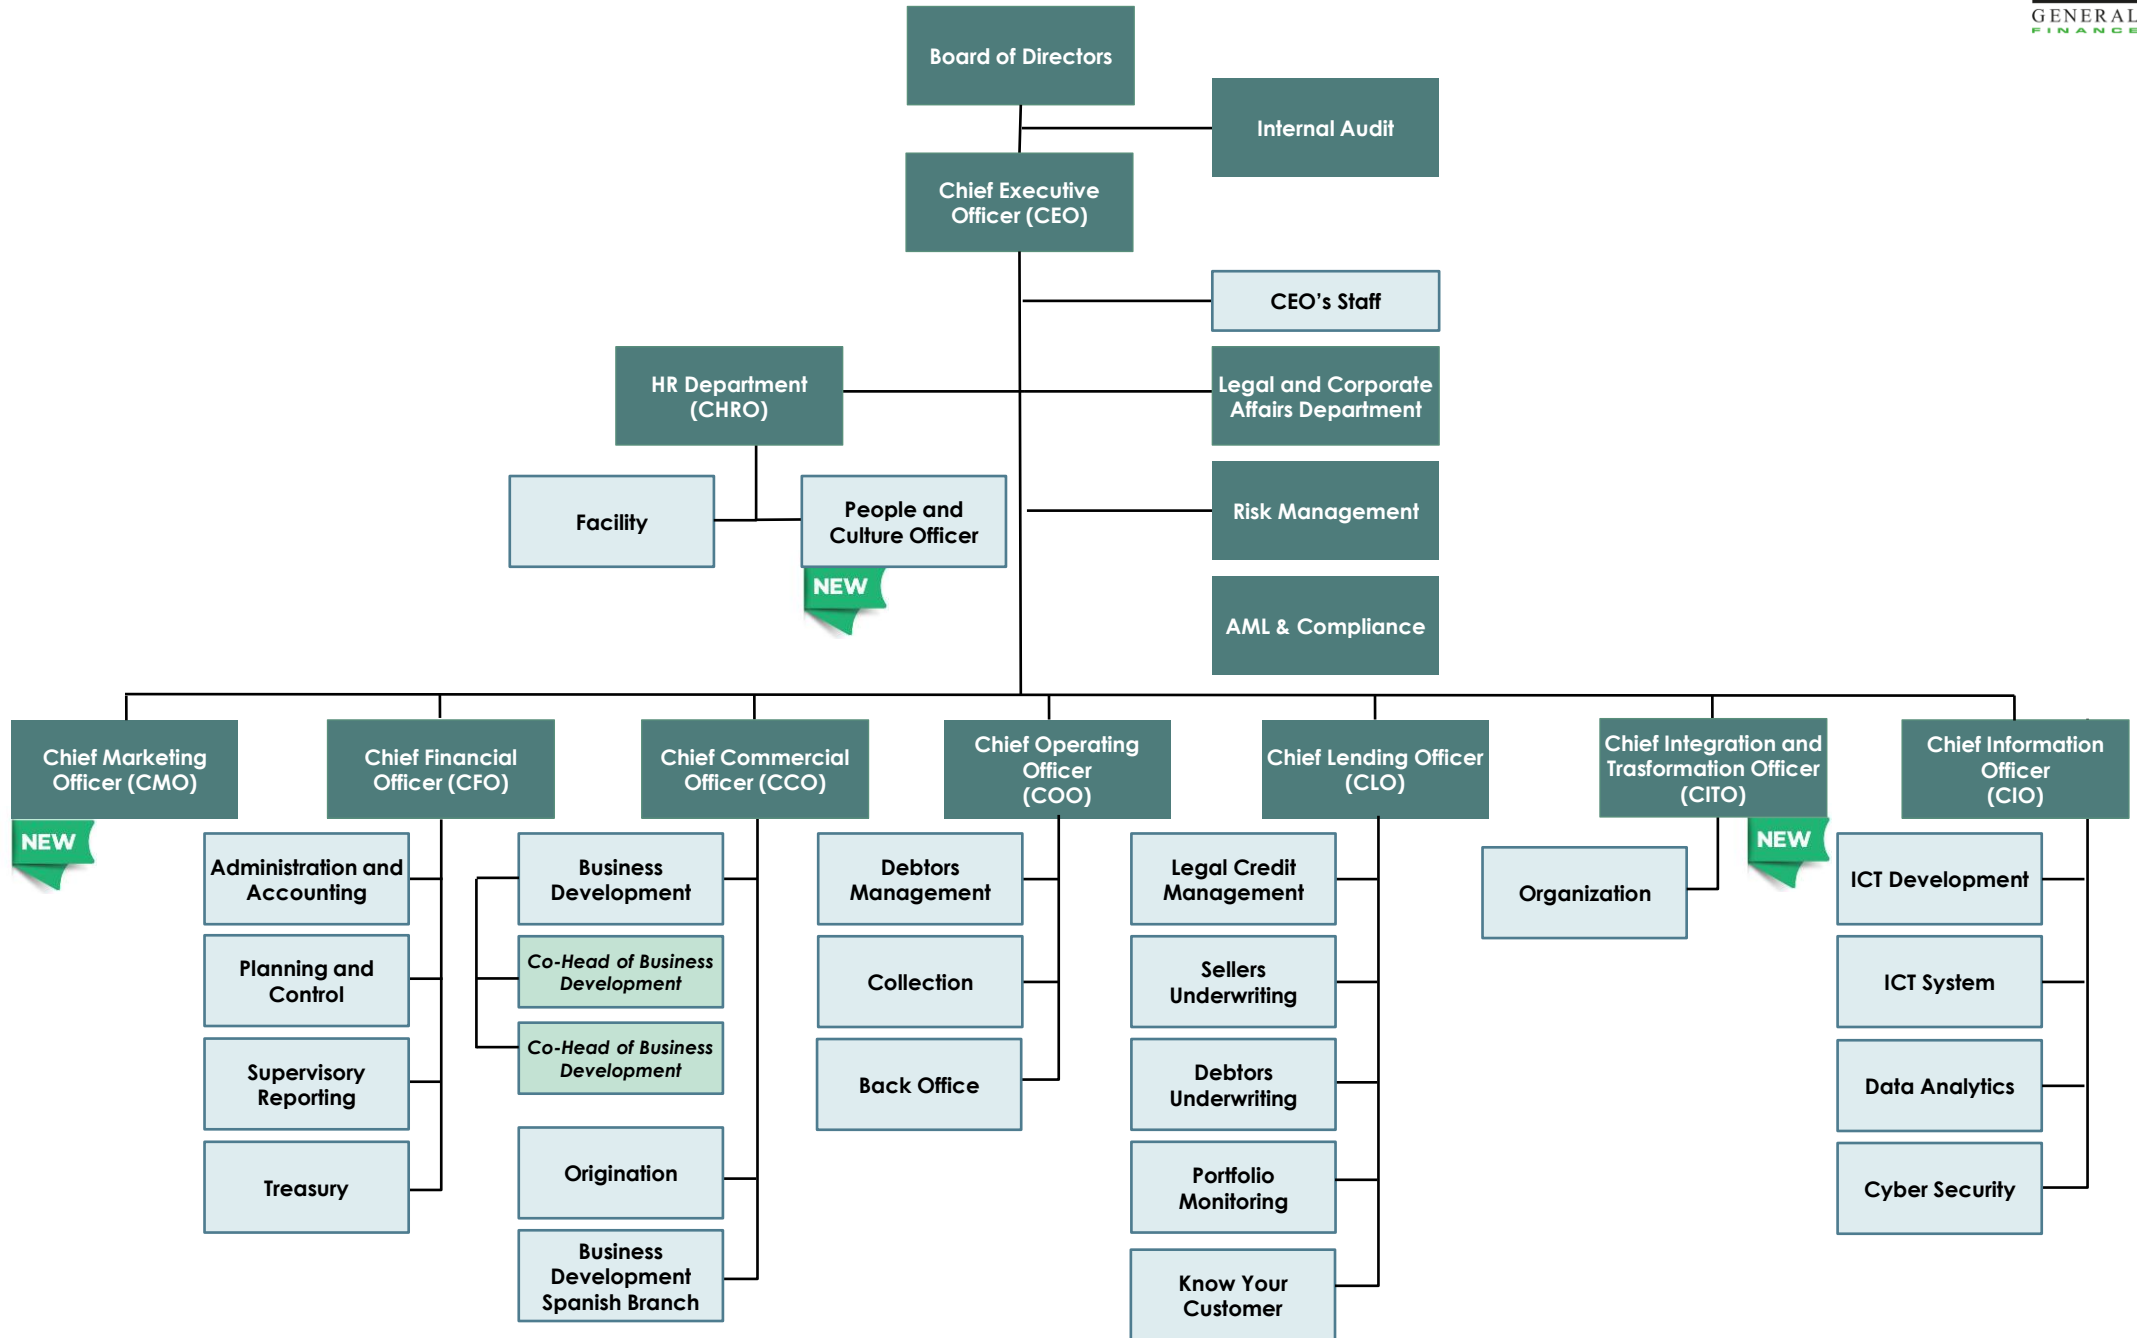

A strategic asset: our proprietary digital platform

Data LTM, as of December 2025

Total transactions: sum of Automatic Disposal, Automatic Disbursement, Automatic settlement, Installments and Automated notifications

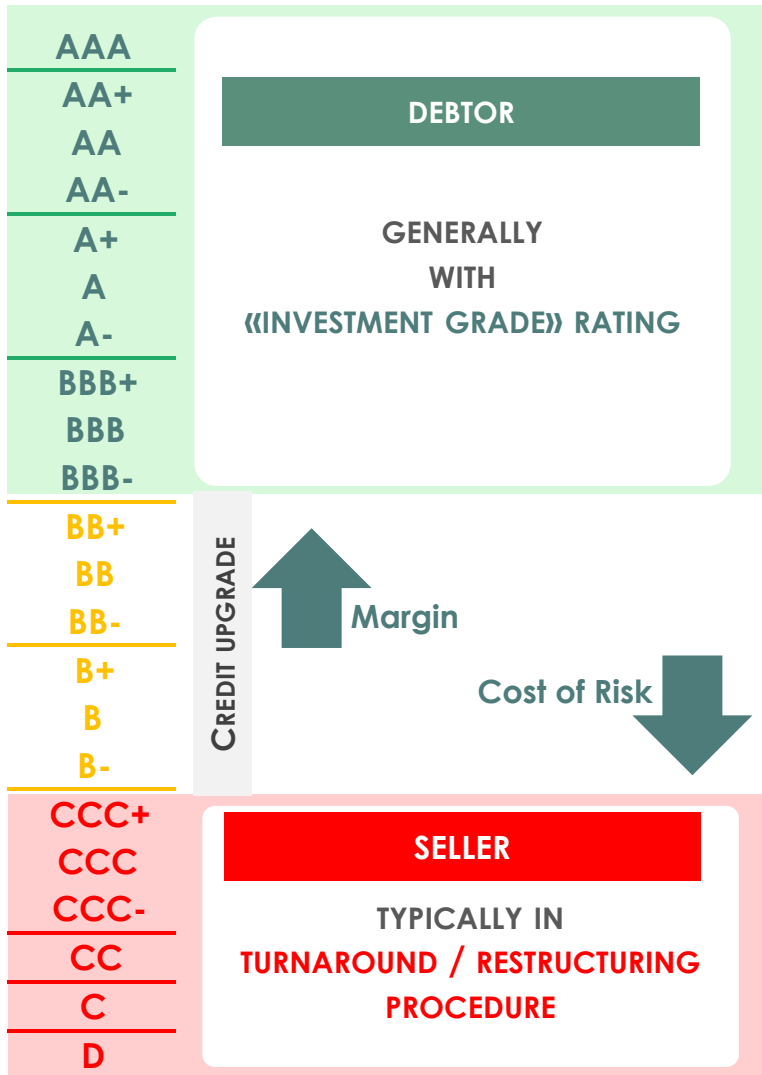

An organization oriented to risk control and business

A unique business model, leveraging factoring features

The peculiarity of Generalfinance's business model is the choice of Seller-Debtor, where clients (**Sellers**) typically have a **low credit rating** ("Special situation") while the **Debtors** underlying customer loans refer to a **high credit rating** (normally investment grade)

Value proposition, distinctive features and value chain

1 Value proposition

Generalfinance offers its customers (mostly companies under financial stress) rapid and customized interventions for the financing of the working capital and trade receivables, covering the entire supply chain finance

2 Distinctive skills

- **Consolidated expertise** throughout the entire process
- **End-to-end in-house valuation process**, tailored to customer specifications
- **Strong risk reduction and diversification mechanisms**
- **In-house-developed proprietary factoring platform** to support business specifications
- **Fast operational processes** and capability to **provide bridge financing** within turnaround processes

3 Generalfinance masters all the crossroads of the value chain

- All operational steps and core activities are **carried out internally** by Generalfinance's dedicated structures
- Generalfinance does not rely on external consultants to assess the creditworthiness of sellers and debtors but **owns all the skills**
- The process is reinforced by **credit insurance policies** provided by Allianz Trade insurance company which, during the risk acquisition phase, performs an independent assessment of the assigned debtors, providing Generalfinance a feedback on the results of their assessment

Risk reduction in Distressed Factoring

Given that the majority of Generalfinance's turnover is realized towards distressed Sellers, the Company can benefit from a reduction in risk, because of 3 main factors

Lower Credit Risk

- Effects of insolvency proceedings on financial position (ex. credit write-offs)
- Recovery and relaunch plan
- Possible change in the Governance
- Possible capital injection or new financing
- Preeductibility (i.e., superpriority) of receivables arising from loans disbursed in execution of the plan and loans disbursed prior to the submission of the composition with creditors plan, respectively, if the conditions provided by the regulations are met

Lower Operating Risk

- Court approval (arrangement with creditors, restructuring agreement)
- Supervision by the court commissioner (arrangement with creditors)
- Presence of high standing Financial Advisors and Legal Counsels
- Management change

Lower Risk of Clawback Action

- Financial assistance for the implementation of the agreement / plan / arrangement with creditors with exemptions from clawback actions
- Authorization for bridge financing (in these cases, the risk of clawback actions is excluded on a *de facto* basis)
- Factoring law and related protections (clawback actions regarding collections from assigned debtors)

International growth in the Spanish market

- ✓ Spain offers a **legal and regulatory framework** similar to Italy, allowing greater operational flexibility as factoring is considered an atypical contract and is not subject to restrictions.
- ✓ Generalfinance plans to **replicate its operational and origination model** in Spain, adapting it to local specifics.
- ✓ The **absence of specialized players** in distressed factoring highlights a strategic opportunity for Generalfinance.
- ✓ The branch is based on a low cost model and is located in **Madrid**.

The Factoring & Confirming market in **Spain reached ~267 €bn in 2024** (~ 16.7% of GDP) with a **turnover CAGR of ~10%** between 20'-24'

International growth in the Swiss market

- ✓ The post-pandemic credit crunch sees **Swiss banks becoming more restrictive in their lending to SMEs** and could open opportunity for factoring.
- ✓ The structure of the Swiss economy is **characterized by small and medium-sized enterprises** (>99% of companies); ~55% of employees work for companies with more than 50 employees and therefore **fall into the initial target market of Generalfinance**.
- ✓ The **Swiss economy has remained stable** from both real economy and financial market perspectives in recent years, yet **credit deterioration and high bankruptcy risks persist**.

Benefits of pro-solvendo lending contract

The offsetting mechanism is a specific technicality of the Factoring Agreement, which is elaborated consistently with the Assifact standard

ARTICLE 28 OF GENERALFINANCE FACTORING AGREEMENT

"The Factor will be entitled to retain sums and set off the debts (of every kind) due by the Factor to the Seller against the Receivables (of every kind) due from the Seller to the Factor, including the Receivables due from the Seller to third parties and assigned to/guaranteed by the Factor.

Should the Seller default on any of its payment obligations, the Factor will be able to treat its Receivables as liquid and payable, even if not already fallen due. Offsets by the Seller require the prior written consent of the Factor".

A PRACTICAL EXAMPLE:

In FY 2025, Generalfinance paid an average advance equal to **78%** of Turnover. With regard to the pro-solvendo factoring, Generalfinance is entitled to set off amounts owed by the Sellers to it against amounts owed by Generalfinance to the Sellers based on specific clauses included in the factoring agreement.

The Company has a high Debtor/Seller ratio equal to **59**, growing steadily over the last 3 financial years, against an average of the Italian factoring market - calculated excluding private assigned Debtors - equal to 6¹, which expands the possibilities of **offsetting between receivables and debit items against the Sellers as part of pro-solvendo transactions.**
